- Brand Identity & UI/UX Design
- SEO & Content Optimization

PROFILE

Full-stack developer and founder of OXVID Systems, with a professional path that started in telecom network engineering and grew into custom web development, AI agents & automation, and brand & growth services. Fourteen live client projects delivered across real estate, hospitality, healthcare, e-commerce, construction and home services — from WordPress and Elementor builds to React / TypeScript applications, backed by workflow automation and end-to-end SEO.

EXPERIENCE

Founder & Lead Developer — OXVID Systems Oct 2023 – Present

- Founded and run OXVID Systems, delivering custom web development, AI agents & automation, content, and brand identity work end to end for clients.
- Designed and shipped 14 live client websites — WordPress/Elementor and React/TypeScript builds — spanning real estate, hospitality, healthcare, e-commerce, construction, beauty and home-services businesses.
- Built AI-driven automation for lead management and business workflows using n8n, custom MCP servers and the Claude Agent SDK.
- Provide full-service SEO (on-page and off-page), content writing, and brand identity/UI design alongside development.

Frontend Developer — Speridian Technologies, Lahore

Feb 2022 – Oct 2023

- Built and maintained responsive, production frontend interfaces for client applications.
- Worked from design handoffs to pixel-accurate, cross-browser implementations.
- Collaborated with backend and QA teams to ship features on release cycles.

Full Stack Developer Intern — Nextage Technologies

Jan 2021 – Feb 2022

- Developed and supported full-stack features across frontend and backend layers.
- Worked with databases and APIs to connect application logic to data.
- Gained production experience that carried directly into the current React/TypeScript practice.

Network Administrator — MaxTel Pvt. Ltd, Okara

Mar 2017 – Nov 2020

- Administered and maintained the organisation's network infrastructure and connectivity.
- Monitored uptime and troubleshoot network and systems issues.
- Managed technical operations that later informed a systems-minded approach to automation and integrations.

EDUCATION

BSc Computer Science
University of Punjab, Lahore
2011 — 2013

FSc (Pre-Engineering)
Govt. Boys College, Okara
2009

Matric (Computer Science)
Govt. M.C. High School, Okara
2004 — 2006

OMCR Engineer — Mobilink MSc, Lahore Aug 2012 – Dec 2014

- Monitored radio-network operations for a national telecom carrier.
- Tracked network performance and escalated faults for resolution.
- First professional role — the start of a career now in its second decade.
